

# HEALTH<sub>efx</sub>

## THE STARTING POINT FOR HEALTHCARE DIGITAL SIGNAGE

HEALTHefx is a professional digital signage system designed for the users who do not require the broad range of features of the full VIZIONefx enterprise digital signage platform. HEALTHefx allows users to choose a configuration that works best for their specific application, saving money and eliminating unnecessary features and complexity. Completely scalable, HEALTHefx is ideal for both small and large signage networks, providing unprecedented ease-of-deployment and an easy growth path for future expansion.

HEALTHefx is built on the award winning X20 platform, which means users enjoy the same uncompromising output quality and web-based management, all at an affordable cost. Each configuration is available as a turnkey package, including all necessary player hardware and software, as well as access to the Web Portal for managing content on any screen from anywhere in the world.
